AISG · AI SAFEGUARDING & GOVERNANCE

The 4Cs after KCSIE 2026

One page mapping the four areas of online risk to what AI incidents look like in school. KCSIE 2026 applies from 1 September 2026.

> Whichever C an incident sits under, the staff route is identical: **listen → don't look or copy → note → tell the DSL.** The 4Cs help the DSL, not the first responder.

Area of risk	What it covers	AI examples in school
Content	A child sees something harmful	AI-generated violent or sexual material; convincing fakes and misinformation; chatbot answers that encourage harm
Contact	A child interacts with someone — or something — harmful. KCSIE 2026 includes generative AI that simulates human conversation	Companion apps simulating friendship or romance; chatbots encouraging secrecy or isolation; adults using AI to approach children
Conduct	Behaviour by or towards a child. KCSIE 2026 includes explicit images generated using AI	"Nudes and semi-nudes" — altered and wholly AI-made (deepfakes) included; "nudify" apps used even "as a joke"; AI-assisted bullying
Commerce	A child is exploited financially	Sextortion — threats and demands for money over images; AI-built scams; pressure to pay inside companion apps

! Sextortion: go to the DSL before the pupil goes home. Risk of self-harm: call 999.

Also statutory in KCSIE 2026

- Filtering and monitoring reviewed at least once every academic year, with records kept.
- The DSL's role includes understanding the school's filtering and monitoring systems.
